Higher education revenues per student

Tuition and fees, government appropriations, and gifts and endowments provide most of the revenues for institutions of higher education. The proportion of total revenues from each source can vary from year to year, thus requiring administrators of U.S. colleges and universities to be alert to changes in the overall availability of funds. The availability of funds and their sources affect decisions about rates for tuition and fees and, in turn, the cost of providing and completing a higher education degree.

- The primary source of revenue for all public institutions comes mainly from state and local government appropriations. Between 1986 and 1996, state and local government appropriations per full-time-equivalent (FTE) student fell both in constant 1995–96 dollars and as a share of all revenue at public universities from \$8,980 to \$7,994 and from 51 to 40 percent as a share of all revenue (see supplemental tables 39-1 and 39-2).
- Between 1986 and 1996, tuition and fees per FTE student increased both in constant dollars and as a share of all revenue at public institutions. At public universities, for example, tuition and fees
- rose from \$3,186 to \$4,825 in constant 1995–96 dollars and from 19 to 25 percent as a share of all revenue between 1986 and 1996 (see supplemental table 40-1).
- Between 1986 and 1996, average tuition and fee revenue per FTE student increased at private universities, rising from \$12,000 to \$16,299 in constant 1995–96 dollars. In addition, revenue from private gifts and endowment income per FTE student climbed by 37 percent (from \$6,014 to \$8,227), compared with an increase of 12 percent at private 4-year colleges (from \$2,794 to \$3,134).

General education revenues of higher education institutions per full-time-equivalent (FTE) student (in constant 1995-96 dollars), by selected revenue sources and control and type of institution: Academic years ending 1977-96

 ^{*} Federally supported student aid received through students (e.g., Federal Student Loan Programs) is included under tuition and fees.

NOTE: The Higher Education Price Index (HEPI) was used to calculate constant dollars. Data for academic years 1976–77 through 1985–86 include only institutions that provided both enrollment and finance data. Data for "Gifts and endowment" and "Federal appropriations" do not always match individual categories presented in table 39-2 due to rounding. FTE students include both undergraduate and

graduate students. Data from academic years ending 1989 to 1995 were revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS) "Financial Statistics of Institutions of Higher Education" survey and Integrated Postsecondary Education Data System (IPEDS) "Institutional Characteristics," "Financial Statistics," and "Fall Enrollment" surveys.

1996	6,782	1,574	30	4,169	378	502	73	8	49

^{*} Federally supported student aid received through students (e.g., Federal Student Loan Programs) is included under tuition and fees.

NOTE: The Higher Education Price Index (HEPI) was used to calculate constant dollars. Data for academic years 1976–77 through 1985–86 include only institutions that provided both enrollment and finance data. FTE students include both undergraduate and graduace students. Data for 1989 to 1995 were revised from previously published figures. Details may not add to totals due to rounding.
